PETROSLEEVE® Becomes Newest Data Provider to ISNetwork

[Nisku, Alberta, January 2004]: PETROSLEEVE® Inc. has reached an agreement with ISN Software Corporation (ISN) as their newest Data provider to provide PETROSLEEVE® training results to its clients utilizing ISNetwork's online data management site.

Mike Miller, Operations Manager of PETROSLEEVE®, said, " We evaluated the services of ISN through discussions with our clients and ISN representatives. We found that there was an obvious fit to be able to allow our ISNetwork associated clients the ability to view their PETROSLEEVE® training information through this online data management site. We feel that our association with ISN can only improve or enhance the way that training records can be managed and is consistent with our commitment to improvement.

For more information regarding ISNetwork, go to <http://www.isnetwork.com/>.

The patented PETROSLEEVE® is the only permanent, non-intrusive pipe repair system that can be installed in 1 hour without interrupting operations. PETROSLEEVE® provides validated training information to assist our clients with their internal Contractor HSE Management Programs. For more information, visit <http://www.petrosleeve.com>.
